Preface

Learning sciences research explores the nature and conditions of learning as it occurs in educational environments, broadly construed. The learning sciences field draws upon multiple theoretical perspectives and research paradigms in order to understand and improve human learning, cognition, and development. Over the last two decades the learning sciences community has developed powerful technological tools, curricular interventions, theories, and methods for understanding and improving teaching and learning as it unfolds in naturalistic contexts.

Learning sciences takes an interdisciplinary approach to the study of learning, cognition, and development in real-world contexts. Learning scientists believe that any investigation of teaching and learning must consider context, cognition, and learning architecture, which we treat as inextricably intertwined. All who are interested in the study of learning in context and the design of learning environments should find the work in these Proceedings to be of interest.

While learning scientists can present rich accounts of learning in complex contexts, convincing policy makers, teachers, and other researchers of the theoretical and practical value of our work; it is not a straightforward process. We must show impact at the local level, while at the same time working to advance claims that have more general value. In other words, we must make clear that the learning sciences make a difference.

Toward this end, the *Seventh International Conference of the Learning Sciences (ICLS 2006)* is explicitly focused on the theme “Making a Difference.” Much of the work in these Proceedings demonstrates how our work is making a difference: to students, teachers, schools, and policy makers; to research approaches and methods; to theories and models of learning, instruction, and assessment. Each proposal in these Proceedings was blind reviewed by three independent reviewers to ensure high quality work. We hope that others will find the lessons shared in these pages relevant to their work.

Acknowledgements

Organizing this meeting was a substantial undertaking. Receiving and reviewing proposals, assembling the Proceedings, and organizing the actual conference required many hands. There are many people we owe our sincere thanks in making this year’s conference a reality.

We offer special thanks for the tireless hours and work of Melissa Goodnight and Karla Frownfelter in organizing these Proceedings. Similarly, our designer Paul Whitener also made many last-minute changes and developed the artwork. Their hard work has made the editors and the contributors look their best.

We would like to thank members of the Indiana University community for their support, both personnel and monetary. These include IU Learning Sciences Program and Program Head, Dick Lesh; the IU Center for Research Learning and Technology; IU School of Education and Dean Gerardo Gonzalez; IU School of Informatics and Dean Michael Dunn; IU Office of

International Programs; IU Vice President of Research, Michael A. McRobbie; and IU Office of the Chancellor.

Putting on a conference for the first time can be an overwhelming and complex enterprise. Mary Morgan of the IU Conferences office has been an amazing resource and help in juggling all of the demands of a conference co-chair. We would like to extend our sincere thanks for her tireless work, patience and persistence. We would also like to thank IU Learning Sciences Professor Tom Duffy for his initial involvement in organizing the conference.

The National Science Foundation has been a consistent supporter of past and current meetings the ICLS. We would like to once again recognize the foundation and program officers (particularly Elizabeth VanderPutten, Robert Sherwood, and Larry Suter) for their commitment to the field through the significant support of *ICLS 2006*. Special recognition should be mentioned for their support of graduate students and early career scholars. Their forward thinking and support will pay great dividends in the quality of our future.

This is the first ICLS that has had the benefit from a fully formed International Society of the Learning Sciences (ISLS) organization to support and guide the development of the conference. In particular, we would like to thank ISLS members Janet Kolodner, Roy Pea, Claire O' Malley, Nancy Songer, William Sandoval, Chris Hoadley, Danny Edelson, and Cindy Hmelo-Silver for their help and guidance. We would also like to acknowledge the suggestions and help of other ISLS members, particularly our international colleagues, including Paul Kirschner, Sanna Jarvela, Bronwyn Stuckey, and Hans Spada.

We would also like to give a special thanks to the *ICLS 2004* chair, Yasmin Kafai, in helping us plan for the hills and valleys of conference work. Her wisdom in handling the many issues of the *ICLS 2006* has been much appreciated. We hope to do the same for the *ICLS 2008* chairs.

Finally, we would like to recognize the many individuals who reviewed the submitted proposals for all their hard work and the contributors that make the ICLS an exciting conference. We are sure that their creativity and scholarship will make the *ICLS 2006* and these Proceedings a significant contribution to the Learning Sciences community.

Chairs

Sasha A. Barab
Kenneth E. Hay
Daniel T. Hickey

ICLS 2006 CONFERENCE PROGRAM

Conference Co-chairs

Sasha Barab, Indiana University, Bloomington
Kenneth Hay, Indiana University, Bloomington
Daniel Hickey, Indiana University, Bloomington

Conference Steering Committee

ISLS Board Representatives

Daniel Edelson, Northwestern University
Cindy Hmelo-Silver, Rutgers University
Yasmin Kafai, UCLA

International Relations

Paul Kirschner, Open University of the Netherlands
Bronwyn Stuckey, Queensland University of Technology

Doctoral Consortium

Susan Goldman, University of Illinois, Chicago
Claire O'Malley, University of Nottingham

Jr. Consortium

Janet Kolodner, Georgia Institute of Technology
William Sandoval, UCLA

Workshops

Christopher Hoadley, Pennsylvania State University
Sanna Jarvela, University of Oulu, Finland

Conference Coordination and Registration

Mary Morgan, Indiana University Conferences

Student Volunteers

Joyce Alexander, Indiana University

Web Design

Paul Whitener, Empowered Media

ICLS 2006 Reviewers

The conference organizers sincerely thank the following individuals who reviewed proposals for the ICLS 2006 conference:

Dor Abrahamson	Albert Corbett	Bruce Havelock
Faisal Ahmad	Jennifer Crawford	Kenney Hay
Valarie Akerson	Theresa Cullen	Libby Hemphill
Tonya Amankwatia	Chandima Cumaranatunge	Phillip Herman
Chris Amelung	Laura D'Amico	Daniel Hickey
Heejung An	Joshua Danish	Thomas Hills
Kate Anderson	Elizabeth Davis	Cindy Hmelo-Silver
Charoula Angeli	Jason Day	Christopher Hoadley
Xornam Apedoe	Chris Dede	Douglas Holton
Margret Arnold	Donna DeGennaro	YaHuei Hsu
Roger Azevedo	Rodrigo del Valle	Roland Hubscher
Xin Bai	Vanessa Dennen	Jim Hudson
Sasha Barab	Ning Ding	Barbara Hug
Judith Barak	Chaoyan Dong	Andy Hurford
Michael Barnett	Corey Drake	Yavuz Inal
Philip Bell	Oliver Dreon Jr.	Adam Ingram-Goble
David Bergin	Amy Duffy	Ioan Gelu Ionas
Marina Bers	Thomas Duffy	Asghar Iran-Nejad
Madhumita Bhattacharya	Ravit Golan Duncan	Michael Jacobson
Kristen Blair	Nicholas Duran	Heisawn Jeong
Paulo Blikstein	Angela Eckhoff	Kirk Job-Sluder
Chutima Boonthum	David Eddy Spicer	Aditya Johri
William Brescia	Daniel Edelson	Frankie Jones
Leah Bricker	Eric Ellis	Diana Joseph
Stephen Briner	Noel Enyedy	Yih-Ruey Juang
Sean Brophy	Eva Erdosne Toth	A. Susan Jurow
Matthew Brown	Bernhard Ertl	Yasmin Kafai
Amy Bruckman	Howard Everson	Ugur Kale
Stein Brunvand	Deborah Fields	Yael Kali
Thomas Brush	Barry Fishman	Yanrong Kang
Roland Bullard	Jim Foley	Haijun Kang
Olin Campbell	Paola Forcheri	Lijie Kang
Reality Canty	Andrea Forte	Victor Kaptelinin
Antonella Carbonaro	Ina Fourie	Manu Kapur
Karen Carney	Ruth Gannon-Cook	Diane Jass Ketelhut
Darla Castelli	Elhanan Gazit	Beaumie Kim
Alice Cavallo	Xun Ge	Bosung Kim
Stephanie Cawthon	Libby Gerard	Nari Kim
Hsin-Yi Chang	Janice Gobert	Yanghee Kim
Elizabeth Charles	Yuksel Goktas	Paul Kirschner
Clement Chau	Ricki Goldman	Ben Kirshner
Fei-Ching Chen	Susan Goldman	Jayne Klenner-Moore
Wei-qin Chen	Amelia Gotwals	Melissa Koch
Ellina Chernobilsky	Jamillah Grant	Janet Kolodner
Cynthia Carter Ching	Ingrid Graves	Timothy Koschmann
Clark Chinn	Jeffrey Greene	Beth Kubitskey
Doug Clark	Melissa Gresalfi	Maria Lorna Kunnath
Jody Clarke	Phyllis Grummon	Eun Ju Kwon
Tamara Clegg	Alan Hackbarth	Eleni Kyza
Allan Collins	Tony Hall	James Laffey

Eduardo Lage-Otero	Ming Fai Pang	Florence Sullivan
Minna Lakkala	Praveen Paritosh	Daniel Suthers
Mary Lamon	Sanghoon Park	Vanessa Svihla
Christine Larson	Orit Parnafes	Karen Swan
Fai-Kim Lau	Roy Pea	Elisabeth Sylvan
Mike Lawson	William Penuel	Ai-Girl Tan
Victor Lee	Hans-Rüdiger Pfister	Roger Taylor
JeongMin Lee	Corey Pierce	Kona Taylor
Youngmin Lee	Philip Piety	Stephanie Teasley
Yu-Wei Lee	Niels Pinkwart	YaTing Teng
Mary Leonard	Joe Polman	Timothy Teo
Dalit Levy	Cassidy Puckett	Sharon Tettegah
Junlei Li	Sadhana Puntambekar	John Thompson
Erin Lightman	Chris Quintana	Heather Toomey-Zimmerman
Cher Ping Lim	Michael Reigh	Stefan Trausan-Matu
Jung Lim	Aaron Richmond	Nobuyuki Ueda
Guan-Yu Lin	Jochen Rick	Jody Underwood
Hsien-Ta Lin	Ann Rivet	Leo Ureel II
Marcia Linn	Jenny Robins	Phil Vahey
Jordan Lippman	Cecil Robinson	Mark van't Hooft
Lei Liu	Jennifer Robinson	Wouter van Joolingen
Pei-Ju Liu	Miky Ronen	George Veletsianos
Shijuan Liu	Jeremy Roschelle	Michelle Verges
Kate Lockwood	Michael Rowe	Geeta Verma
Steven Lonn	Nikol Rummel	Yusra Visser
Loucas Louca	Donna Russell	Christian Voigt
April Luehmann	Nora Sabelli	Joan Walker
Kenneth Luterbach	Troy Sadler	Andrew Walker
Leilah Lyons	Johann Sarmiento	Feng Wang
Maria Madiope	Tom Satwicz	Scott Warren
Mouna Mana	Leah Savion	Armin Weinberger
Rebecca Mancy	Daniel Schwartz	Martin Wessner
Lina Markauskaite	David Shaffer	Eun Won Whang
Sandra Martell	Patti Shank	Tobin White
Thomas Martens	Tamara Shanker	Astrid Wichmann
Fred Martin	Brett Shelton	Eric Wiebe
Julia Matuga	Miriam Sherin	Michelle Williams
Philip McCarthy	Wesley Shumar	Robert Williams
Michael McCracken	Bernadette Sibuma	Clyde Winters
Scott McDonald	Arnan Sipitakiat	Alyssa Wise
Steven McGee	Brian Smith	Don Wortham
Diane McGrath	Hyo-Jeong So	Kenneth Wright
Katherine McNeill	Nancy Songer	Lisa Yamagata-Lynch
Daniel McVeigh	Hans Spada	Jude Yew
Tom Moher	Kurt Squire	Susan Yoon
Gaëlle Molinari	Tina Stanford	Amir Abbas Zadpoor
Chrystalla Mouza	Haley Steele	Jose Zagal
Hanni Muukkonen	Constance Steinkuehler	Raul Zaritsky
Mitchell Nathan	Reed Stevens	BaoHui Zhang
Michael Nussbaum	James Stewart	Jianwei Zhang
Kevin O'Connor	Mike Stieff	Meilan Zhang
Claire O'Malley	Helga Stokes	Steven Zuiker
Maria Opfermann	Jan-Willem Strijbos	Laura Zurita
Chandra Orrill	Johannes Strobel	Janet Zydney
Jakita Owensby	Bronwyn Stuckey	

Table of Contents

Volume I

Papers

From Evidence to Explanations: Engaging undergraduate Geology Students in Inquiry Xornam Apedoe	2
Frames and Games in the Science Museum: A Lens for Understanding Visitor Behavior Leslie Atkins.....	9
Is Externally-regulated Learning by a Human Tutor Effective in Facilitating Learning with Hypermedia? Roger Azevedo, Jeffrey Greene, Daniel Moos, Fielding Winters, Jennifer Cromley, Pragati Godbole-Chaudhuri.....	16
Didn't I Tell You That? Challenges and Tensions in Developing and Sustaining School - University Partnerships Michael Barnett, Thomas Higgenbotham, Janice Anderson	23
Interface Agents to Alleviate Online Frustration Amy L. Baylor, Rinat B. Rosenberg-Kima	30
Children's Text Comprehension: Effects of Genre, Knowledge and Text Cohesion Rachel Best, Yasuhiro Ozuru, Randy Floyd, Danielle McNamara	37
Characterizing the Quality of Second-Graders' Observations and Explanations to Inform the Design of Educative Curriculum Materials Carrie Beyer, Elizabeth Davis	43
Shifting Epistemologies: Examining Student Understanding of New Models of Knowledge and Learning Katerine Bielaczyc, Peter Blake	50
Using Log Files to Track Students' Model-based Inquiry in Science Barbara Buckley, Janice Gobert, Paul Horwitz, Amie Mansfield.....	57
Direct-manipulation Animation: Incorporating the Haptic Channel in the Learning Process to Support Middle School Students in Science Learning and Mental Model Acquisition Margaret S. Chan, John B. Black	64
Student-generated Animations: Supporting Middle School Students' Visualization, Interpretation and Reasoning of Chemical Phenomena Hsin-Yi Chang, Chris Quintana	71

From Mechanical to Meaningful Classroom Questions Elizabeth S. Charles, Janet L. Kolodner, Sabina Karkin, Christopher W. Kramer	78
Revealing and Mediating Young Children's Memory and Social Cognition through Digital Photo Journals Cynthia Carter Ching, X. Christine Wang.....	85
Promoting Learning in Informal Learning Environments Tamara Clegg, Christina Gardner, Oriana Williams, Janet Kolodner	92
The Impact on Learning of Generating vs. Selecting Descriptions in Analyzing Algebra Example Solutions Albert Corbett, Angela Wagner, Sharon Lesgold, Harry Ulrich, Scott Stevens.....	99
What Makes Groups Learning Effectively in a Videoconference Setting? Ulrike Cress, Hron Aemilian, Friedrich Felix, H. Hammer Karsten.....	106
Unpacking the Mediation of Invented Representations Joshua Danish.....	113
Technology Fluency as Cultural Practice: Bridging Local Understandings in a Diverse Learning Environments Donna DeGennaro	120
Collaborative Learning in a 3D Virtual Environment: Design Factors and Evaluation Results Nicoletta Di Blas, Caterina Poggi, Thomas Reeves	127
Using Teacher Narrative to Understand Teachers' Uses of Curriculum Materials Corey Drake	134
Using an Online Community of Practice to Foster Inquiry as Pedagogy amongst Student Teachers Oliver Dreon Jr., Scott McDonald.....	140
The Role of Domain-specific Knowledge in Promoting Generative Reasoning in Genetics Ravit Golan Duncan	147
Making a Difference - Exploiting the Full Potential of Instructionally Designed On-Screen Videos Anna Ertelt, Alexander Renkl, Hans Spada	154
Effects on an Individual's Prior Knowledge on Collaborative Knowledge Construction and Individual Learning Outcomes in Videoconferencing Bernhard Ertl, Heinz Mandl	161
Fostering Innovation Implementation: Findings about Supporting Scale from GLOBE Barry Fishman, William Penuel, Ryoko Yamaguchi	168

A Case Study of Elementary Students' Argumentation in Science Seau Yoon Foo, Dr. Chee Kit Looi	175
From Wikipedia to the Classroom: Exploring Online Publication and Learning Andrea Forte, Amy Bruckman	182
Shared Knowledge Construction Process in an Open-source Software Development Community: An Investigation of the Gallery Community Xun Ge, Yifei Dong, Kun Huang.....	189
Measuring Students' Scientific Content and Inquiry Reasoning Amelia Gotwals, Nancy Songer	196
Adolescents' Use of Self-regulatory Processes and Their Relation to Qualitative Mental Model Shifts While Using Hypermedia Jeffrey Greene, Roger Azeveo	203
Exploring Differences Between Gifted and Grade-level Students' Use of Self-regulatory Learning Processes with Hypermedia Jeffrey Greene, Daniel Moos, Roger Azevedo, Fielding Winters.....	210
How Can We Use Concept Maps for Prior Knowledge Activation - Different Mapping-tasks Lead to Different Cognitive Processes Johannes Gurlitt, Alexander Renkl, Michael A. Motes, Sabine Hauser.....	217
Measuring Teachers' Algebraic Reasoning: Development and Preliminary Validation of a Video Assessment Task Alan J. Hackbarth, Sharon J. Derry, Margaret J. Wilsman	222
Designing Instructional Support for Individual and Collaborative Demands on Net-based Problem-solving in Dyads Miriam Hansen, Hans Spada	229
Press Play: Designing an Epistemic Game Engine for Journalism David Hatfield, David Williamson Shaffer	236
Supporting Concept Mapping for Learning from Text Sabine Hauser, Matthias Nueckles, Alexander Renkl.....	243
Motivation in Project-based Classrooms: New Measures Better Coupled to Students' Experiences Phillip Herman, Louis Gomez.....	250
The Story of one Urban High School's Efforts to Improve Student Attitudes, Motivation, Self-efficacy and Perceptions of Self, School, and Science through Project-based Science Instruction Thomas Higginbotham, Janice Anderson, Camelia Rosca, Michael Barnett, Deborah Jencunas, Sandra Copman, John Zinkowski.....	257

A Resources Interpretation of Teachers' Epistemologies of Science Sandra Honda, David May	264
Students' Perception of Knowledge Activation on a Guided Collaborative Problem Solving Organizer Wei-Chen Hung, James Lockard.....	270
Characterizing the Nature of Discourse in Mathematics Classrooms Radha Kalathil.....	277
Using Comparisons of Alternate Strategies to Promote Discourse Radha Kalathil.....	285
Changing Conceptual Ecologies with Task-structured Science Curricula David Kanter, Bruce Sherin, Victor Lee	293
Insights into the Emergence of Convergence in Group Discussions Manu Kapur , John Voiklis, Charles Kinzer, John Black.....	300
Productive Failure Manu Kapur.....	307
Classroom Goal Structures for Educational Math Game Application Fengfeng Ke	314
Using Students' Epistemologies of Science to Guide the Practice of Argumentation Lisa Kenyon, Leema Kuhn, Brian Reiser.....	321
Using Drawings and Interviews to Diagram Entering Preservice Teachers' Preconceived Beliefs about Technology Integration. Elizabeth Keren-Kolb, Barry Fishman	328
Scaffolding Learner Motivation through a Virtual Peer Yanghee Kim, Eric Hamilton, Jinjie Zheng, Amy Baylor	335
Coercing Shared Knowledge in Collaborative Learning Environments Paul A. Kirschner, Pieter Jelle Beers, Henny P.A. Boshuizen, Wim Gijsselaers	342
The Social Formation of Leadership in a Youth Activism Group Ben Kirshner.....	349
Optical Pulsars and Black Arrows: Discovery's Work in 'Hot' and 'Cold' Science Timothy Koschmann, Alan Zemel	356
A Role for Professional Development in Sustainability: Linking the Written Curriculum to Enactment Beth Kubitskey, Barry Fishman	363

Fostering Scientific Argumentation by Creating a Need for Students to Attend to Each Other's Claims and Evidence Leema Kuhn, Lisa Kenyon, Brian Reiser.....	370
Developing a Sustainable Instructional Leadership Model: A Six-year Investigation of Teachers in One Urban Middle School Hee-Sun Lee, Nancy Songer, Soo-Young Lee.....	376
"Ugly in a World Where You Can Choose to be Beautiful": Teaching and Learning Diversity via Virtual Worlds Joey Lee, Christopher Hoadley	383
The Interplay between Self-directed Learning and Social Interactions: Collaborative Knowledge Building in Online Problem-based Discussions Silvia Wen-Yu Lee.....	390
Beyond transparency: How students make representations meaningful Victor Lee, Bruce Sherin.....	397
Lurking as Participation: A Community Perspective on Lurkers' Identity and Negotiability Yu-Wei Lee, Fei-Ching Chen, Huo-Ming Jiang	404
Tensions and Tradeoffs in a "Design for Science" Classroom: The "Forces in Balloon" Lecture Mary Leonard, Sharon Derry	411
When the Rubber Meets the Road -- Putting Research-based Methods to Test in Urban Classrooms Junlei Li, David Klahr, Amanda Jabbour.....	418
Effects of Part-task and Whole-task Instructional Approaches and Levels of Learner Expertise on Learner Acquisition and Transfer of a Complex Cognitive Skill Jung Lim, Robert Reiser.....	425
Exploring the Relationship between Teachers' Curriculum Enactment Experience and Their Understanding of Underlying Curriculum Design Rationales Hsien-Ta Lin, Barry Fishman.....	432
Effects of Conceptual Representation on Learning from Hypermedia Lei Liu, Surabhi Marathe, Cindy Hmelo-Silver.....	439
Sustaining and Scaling Innovations in Singapore Schools: Issues for School-based Learning Sciences Research Chee-Kit Looi, Wei Ying Lim.....	446
MUSHI: A Multi-Device Framework for Collaborative Inquiry Learning Leilah Lyons, Joseph Lee, Christopher Quintana, Elliot Soloway.....	453

Using Interviews to Investigate Implicit Knowledge in Computer Programming	
Rebecca Mancy, Norman Reid.....	460
Collaborating to Learn, Learning to Collaborate: Finding the Balance in a Cross-disciplinary Design Course	
Emma Mercier, Shelley Goldman, Angela Booker.....	467
TEEMSS2: Technology Enhanced Elementary Math and Science - Year 1 Report	
Shari Metcalf.....	474
Examining the Fluctuation of Strategy Use during Learning with Hypermedia	
Daniel Moos, Roger Azevedo.....	481
Learning with Laptops: The Impact of One-to-One Computing on Student Attitudes and Classroom Perceptions	
Chrystalla Mouza.....	488
Scaffolding Learning from Contrasting Video Cases	
Anandi Nagarajan, Cindy Hmelo-Silver.....	495
Boolean Classes and Qualitative Research	
Mitchell Nathan, Kristi Jackson.....	502
When Observation Beats Doing: Learning by Teaching	
Sandra Okita, Daniel Schwartz.....	509
Computer-Supported Collaborative Video Analysis	
Roy Pea, Robb Lindgren, Joseph Rosen.....	516
The Distribution of Resources and Expertise and the Implementation of Schoolwide Reform Initiatives	
William R. Penuel, Kenneth A. Frank, Ann Krause.....	522
Effects of Task Difficulty and Epistemological Beliefs on Metacognitive Calibration: A Pilot-Study	
Stephanie Pieschl, Elmar Stahl, Rainer Bromme.....	529
“How Do We See?”: Information Architecture as Theory	
Philip Piety, Annemarie Palincsar.....	536
Author Index	end of volume
Volume 2	
Papers (continued)	
The Role-Goal-Activity Framework Revisited: Examining Student Buy-in in a Project-based Learning Environment	
Virginia Pitts, Daniel Edelson.....	544

Students' Difficulties in Learning Physics from Dynamic and Interactive Visualizations Rolf Ploetzner, Stefan Lippitsch, Matthias Galmbacher, Dieter Heuer	550
True Stories, Storied Truth: Stitching Narrative and Logico-scientific Discourse Together in an Age of "Spin" Joseph L. Polman	557
Learning from Digital Text in Inquiry-based Science Classes: Lessons Learned in One Program Sadhana Puntambekar	564
Estimation as a Catalyst for Numeracy: Micro-interventions that Increase the Use of Numerical Information in Decision-making Luke Rinne, Michael Ranney, Nicholas Lurie	571
Using Transformative Research To Explore Congruencies Between Science Reform and Urban Schools Ann E. Rivet	578
Effects of Document Generation and Source Presentation on Historical Understanding and Thinking Cecil Robinson, Gina Raineri	585
WWW and Multicultural Democracy: Evaluating U.S. History Websites Cecil Robinson, Douglas McKnight	592
Adopt & Adapt: Structuring, Sharing and Reusing Asynchronous Collaborative Pedagogy Miky Ronen, Dan Kohen-Vacs, Nohar Raz-Fogel	599
Co-design of Innovations with Teachers: Definition and Dynamics Jeremy Roschelle, William Penuel, Nicole Shechtman	606
Blurring the Lines: Learning and Assessing in Quadrant D Ken Rose, Martin Block	613
Beyond Essentialist Critiques: The Co-development of Individual and Society within Erik Erikson's Psychosocial Theory of Identity Development Sage Rose, Cecil Robinson	620
An Analysis of Standardized Reading Ability Tests: What Do Questions Actually Measure? Michael Rowe, Yasuhiro Ozuru, Danielle McNamara	627
Learning to Collaborate in a Computer-mediated Setting: Observing a Model Beats Learning from Being Scripted Nikol Rummel, Hans Spada, Sabine Hauser	634

It's Okay to be Wrong: Recognizing Mechanistic Reasoning During Student Inquiry	
Rosemary Russ, Paul Hutchison.....	641
Inquiry into Mediated Action: The Implementation of an Innovative Online Problem-based Unit	
Donna Russell.....	648
Assessment of Argument in Science Education: A Critical Review of the Literature	
Victor Sampson, Douglas Clark.....	655
Teaching Students to Evaluate Source Reliability during Internet Research Tasks.	
Christopher A. Sanchez, Jennifer Wiley, Susan R. Goldman	662
Collaborative Learning with Animated Pictures: The Role of Verbalizations	
Mirweis Sangin, Gaëlle Molinari, Pierre Dillenbourg, Cyril Rebete, Mireille Bétrancourt	667
Supporting Science Teacher Thinking Through Curriculum Materials	
Rebecca Schneider	674
Effects of Innovation versus Efficiency Tasks on Recall and Transfer in Individual and Collaborative Learning Contexts	
David Sears.....	681
The Pasteurization of Education	
David Williamson Shaffer, Kurt D. Squire	688
Tools and Task Structures in Modeling Balance Beam	
Ji Shen	695
Effects of Handheld Games on Students Learning in Mathematics	
Namsoo Shin, Cathleen Norris, Elliot Soloway	702
Self-concept and Self-efficacy in Mathematics: Relations with Mathematics Motivation and Achievement	
Einar M. Skaalvik, Sidsel Skaalvik	709
Shared Referencing of Mathematical Objects in Online Chat	
Gerry Stahl, Alan Zemel, Johann Sarmiento, Murat Cakir, Stephen Weimar, Martin Wessner, Martin Mühlfordt.....	716
Fostering Scientific Habits of Mind in the Context of Online Play	
Constance Steinkuehler, Marjee Chmiel	723
Increasing Representational Fluency with Visualization Tools	
Mike Stieff, Michelle McCombs.....	730

Abstract: The focus of this poster is to turn our attention to the arts as an understudied area in the learning sciences and examine how studying the learning of arts and programming can open new avenues of research. Results from a case study analysis suggest that appropriation builds on multiple connections: cultural connections such as referencing popular iconography, personal connections such as including family pictures, and larger epistemological connections to larger bodies of knowledge.

Introduction

Learning science researchers have paid little attention to the field of arts education as the more prominent focus has been on science, math and to a lesser degree, social studies and language arts. Among a number of reasons that can explain this absence of interest is the lack of new technologies in the arts education curriculum. Recently, the Arts Education Partnership (AEP) issued a call for research to further investigate ‘New Technologies and Arts Learning,’ noting that “[n]ew technologies...are changing the nature of arts education” (AEP, 2004). The intersection of arts and technology (called “media art” here) is a relatively new avenue of research that has implications for both the arts and computer sciences, and more generally, the learning sciences. The focus of this poster is to turn our attention to the understudied area of the arts and examine how the learning of arts and programming can open new avenues of research.

A design studio found at a community technology center in South Central Los Angeles presents an interesting opportunity to explore the ways in which youth culture are already making use of new media as tools for expression, particularly capitalizing on software that promote computer programming. The studio and its design software were created with a constructionist theory of learning in mind, which poses that people learn best when they are active participants in design activities and share their design with others (Papert, 1980). The findings outlined here build on one of the main concepts of constructionism, *appropriation*, which posits that learners construct knowledge by making it their own. Resnick (1996) points to two constructional-design principles, which allow the creator to appropriate knowledge through the making of (1) personal connections (i.e., connections to outside interests, past experiences, or prior knowledge) and (2) through epistemological connections (i.e., the ability to connect to important domains of knowledge). We add a third component to this analysis, (3) cultural connections (i.e., connections to larger cultural context). The results suggest that youth leverage previous knowledge in the design process, appropriating the design software through personal, cultural, and epistemological connections to their work.

Methods

Over the past year, we have documented design activities that incorporate computer programming at a design studio with predominantly Latino/a and African-American youth ages 8-18 through extensive ethnographic field note taking (Creswell, 2003). Young artists created a variety media arts projects such as animated stories, Videogame art, and interactive or playable art using pop culture images and sounds. Using a comparative case study approach, the artist in this study was selected from over 30 other case study participants based on the prototypical nature of her work and her persistent interest over a period of multiple weeks in using computer programming for expression. Field notes were open and axial-coded for themes derived from the theoretical framing.

Findings

For this analysis, we draw from an example of a “dance video” called “k2b,” created by a thirteen-year-old female software designer, who modeled the piece after a Gwen Stefani music video. When the viewer presses a start button, music begins to play, characters dance on the screen, and the background changes between several different

images. At the start of the project, the first-time designer had an existing interest in pop music and chose to use “Hollaback Girl” as the basis for her music video. As a result, she chose images and music that reflected her perception of pop culture and music videos. The use of a shared cultural context (i.e., the pop music video) resonated with other members of the design studio. During the design process, members would gather behind the designer to watch the “k2b” video, being drawn in by the music. In addition to her interpretation of the well-known music video, the designer made additional personal connections to the piece such as choosing to insert both a picture of herself and her younger brother as two of the dancers in her music video.

Undoubtedly, when designers create media art they are connecting to many different bodies of knowledge, here we focus on connections to the traditional arts and computer programming. The aesthetics of the images played an important role in the design process. In the search for “k2b” images, it was less important to her to insert an image of herself, as it was to find one that fitted her perception of how a music video should appear, underscoring the importance of understanding and emulating contemporary art and pop culture aesthetics in media art production. Additional connections to traditional arts include the designer’s attention to the choreographing the dancers. “k2b” required precise timing and unique dance moves of each of the characters. During these design moments, programming took a back seat to design considerations of when characters should enter and exit the stage and how each of the dancers should move—roles that seldom assumed by youth in the traditional arts. The designer also made connections to computer science. This is exemplified by the designer’s use of programming concepts like looping constructs, conditionals, and assembling programs out of base components — concepts that are even new for novice computer science majors. In addition, she was able to repurpose code in a meaningful way and accomplish artistic design goals for the piece by taking pieces of code and creatively recombining them for new characters.

Discussion

This case study illuminates how programming within an arts context is very different from context of math and science. Programming in this context is less about code and more about personal expression. While case studies of work in the design studio give us only a partial understanding of the larger design culture, they do provide us with an understanding of how individuals are able to repurpose the design environment for personal expression. The advantages of this work are at least threefold: (1) Media arts have implications for broadening the participation and applications of traditional programming courses in K-12 which tended to focus on mathematics and science; (2) Media arts are an essential component to artistic expression in a digital era—a tool that has an arguably increasing importance for youth and society at large; and (3) these projects emphasize graphic, music and video — media that have been found to be at the core of technology interests for youth and thus could provide new opportunities to encourage and broaden participation of youth from under-represented groups to become designers and inventors with new technologies.
